Dear Bob

Update of personnel changes associated with Babcock International (BI) management of DSRL

I am writing to inform you about impending changes of personnel associated with the Parent Body Organisation (PBO) - Babcock International - who manage DSRL on behalf of the Nuclear Decommissioning Authority.

Over the coming month I will be taking up a new corporate role with Babcock International as Director of Strategy Development. My replacement is Roger Hardy, who will become Managing Director of Babcock Nuclear which will comprise of UKAEA and Babcock Nuclear Services, who have worked on the Dounreay site over the past few years.

My new role will have a broader remit than my previous one. However, and importantly for me, I will retain an interest in Caithness as I have been appointed to the PBO Board of DSRL and hence my association with the North will continue. Please be assured that I will always operate with the best intent towards the well being of the Caithness and North Sutherland community.

Roger Hardy will be visiting DSRL at the first opportunity and I will ensure that he is well briefed on the importance that we all attach to the DSG.

Best Regards

Norman Harrison
Chief Executive Officer
