

## NUCLEAR DECOMMISSIONING SUPPLY CHAIN SUPPORT IN SCOTLAND

### **FREE: in-depth technical or business support**

***Supply Chain Support*** provides a range of technical and business support services to Scottish companies who are in, or have the potential to enter, nuclear decommissioning/new build supply chains.

***Supply Chain Support*** from TWI and its partners is tailored to the needs of each company assisted and can be used to -

- || enhance commercial performance, e.g. through improved tendering
- || implement environmental legislation successfully
- || explore more-effective technologies, new materials and improved designs
- || accelerate innovation
- || troubleshoot production or quality problems
- || increase productivity and reduce costs

**Key to the project is a programme of events including:**

- || **Meet-the-Buyer:** providing opportunities to meet potential customers
- || **Business Focus:** enabling insight into tendering requirements and specifics such as behavioural safety systems
- || **Technology Workshops:** sharing of expertise between sectors such as oil and gas, defence and nuclear

Services to individual companies can also include up to 6 days, in-depth technical and business support from project partners.

The three-year programme is funded by Scottish Enterprise and Highlands and Islands Enterprise, managed by TWI and delivered by The National Nuclear Laboratory, Optimat Ltd, TWI and Silver Stream Business Services.

To find out about events or make an enquiry, please contact at TWI:
