# NDA Monthly Update – January 2016

## Your views needed

The NDA is currently carrying out a consultation on a new approach to the way we work with our customers. This is part of our ongoing commitment to improve our services and ensure we are meeting the needs of our customers. We are looking for your views on a range of issues, including the way we communicate with you, the way we manage our resources, and the way we deliver our services. We will be holding a series of focus groups and public consultations over the next few months. We would like to hear from you on a range of issues, including the way we communicate with you, the way we manage our resources, and the way we deliver our services. We will be holding a series of focus groups and public consultations over the next few months. We would like to hear from you on a range of issues, including the way we communicate with you, the way we manage our resources, and the way we deliver our services.

Anyone who is interested in this consultation can contact the Project Manager at [project.manager@nda.gov.uk](mailto:project.manager@nda.gov.uk).

## New chair for Sellafield Ltd board

The NDA has announced that Tony Founan has been appointed as the new chair of Sellafield Ltd. Tony Founan has been a member of the NDA's Advisory Board since 2011 and has been a member of the Sellafield Ltd board since 2012. He has extensive experience in the nuclear industry and has been involved in a number of key projects, including the decommissioning of Sellafield. Tony Founan will be responsible for leading the board in the development and implementation of the company's strategy and for ensuring that the company is meeting the needs of its customers. He will also be responsible for ensuring that the company is complying with all applicable regulations and standards.

## Last fuel leaves Oldbury

The last fuel element has been removed from the Oldbury A nuclear power station. This marks the end of the station's operational life and the beginning of the decommissioning process. The decommissioning process will involve the removal of the station's core and the dismantling of the station's buildings and infrastructure. The decommissioning process is expected to take several years to complete. The NDA is currently carrying out a consultation on a new approach to the way we work with our customers. This is part of our ongoing commitment to improve our services and ensure we are meeting the needs of our customers. We are looking for your views on a range of issues, including the way we communicate with you, the way we manage our resources, and the way we deliver our services.

# NDA Monthly Update – January 2016

## World's last Magnox plant closes

The world's last Magnox power station, a 1,100 MW power station, has closed after 47 years of operation. The station, located in Heysham, Lancashire, was the last of its kind in the world. It was built in 1969 and was the first Magnox power station to be built in the UK. The station was built by the Central Electricity Generating Board (CEGB) and was operated by British Nuclear Fuels (BNFL). The station was the last of its kind in the world because it was the only one that was built in the UK. The station was the last of its kind in the world because it was the only one that was built in the UK. The station was the last of its kind in the world because it was the only one that was built in the UK.
