Dear David

Contingency Plans for Safe Operation of Site

Thank you for your letter of 31 January 2017 seeking assurance about arrangements in the event of any future industrial action.

Safety, security and environmental compliance will always remain our first priorities. While there remains a commitment to continue dialogue with the trade unions, contingency plans are in place to keep the site safe and secure during any potential action. The plan includes the identification of key roles that would be required to maintain minimum staffing levels.

There is currently no decision from the trade unions or their membership about whether to take industrial action. If a decision is taken to proceed, I will endeavour to keep you updated as details become available.

Yours sincerely

Phil Craig
Managing Director, DSRL
