Phil Craig Managing Director, Dounreay

- Recent updates
- Voluntary redundancies and resources
- Operating targets for 2017/18
- Achievements

Safety and environment

Progress

- **Successful demonstration of our emergency arrangements**
- **Working towards a licence instrument for breeder removal**
- **24 blocks have now been removed from DFR pond**
- **Preparations continue for the demolition of D1251**

Future resources

- Up to 200 roles expected to be reduced during the next year or so
 - Up to 150 DSRL voluntary redundancies
 - Around 50 supply chain roles due to be completed
- Applications now being considered for voluntary redundancy with initial outcomes expected next month
- Working with CNSRP to outline future resource requirements

The year ahead

- Delivery of the exotics programme
- Commencing removal of breeder
- Resource utilisation project
- Progressing the wider decommissioning programme, including:
 - D1251 demolition
 - DFR pond concrete block removal
 - D1200 ventilation refurbishment

Operating targets

**DMTR building complex
decommissioning complete (March 2018)**

**DCP operations – PFR raffinate active
commissioning (Jan 2018)**

**D1200 ventilation installed and
commissioned (Dec 2017)**

**Design, manufacture and trials of four
tools for reactor dismantling (Jan 2018)**

D1204 medium active cell (Dec 2017)

**Complete DFR fuel removal from reactor
(Feb 2018)**

**DCP store extension – detail design
complete for shielded store (July 2017)**

**Loading of first flask with breeder
elements (July 2017)**
