## Programme Manager Update – January 2019

This update incorporates reports from a range of partners involved in delivering elements of the *Caithness & north Sutherland High-level Programme*. By condensing multiple reports into one paper the information will be disseminated more efficiently amongst the various groups such as the CNSRP Advisory Board, Executive Board and the Dounreay Stakeholders' Group.

The major opportunities being taken forward through the Programme (and reported against in this paper) are:

Offshore Wind
Tidal
UK Vertical Launch
Nuclear Services
Business Services
North Coast 500
Oil & Gas
Skills Investment Plan
Inward Investment
Balance of Jobs

## 

The Title Box for each major project will be coloured **each**, Are **o ded**. This will indicate the status of the project's delivery during both the last period and the current period of activity.

Local market	75	90	13	0	13

- The Beatrice Offshore Windfarm has reached yet another project milestone, with over 75% of turbines now installed. The BOWL team is making use of a short-term office space on HIE's Wick Business Park whilst its Operations base on Wick harbourfront is completed, but the project is on course to become fully operational this spring. BOWL and Siemens staff took part in the "Jobs and How To Get Them" event in North Highland College on Saturday 9<sup>th</sup> February as their recruitment programme continues.
- The Caithness-Moray electricity Grid enhancement project has been completed.
- Community engagement events around the Space Hub Sutherland project began in north Sutherland in August with events in Melness and Tongue. These monthly events will continue throughout 2019, with the latest being held in Tongue on 13<sup>th</sup> March and Wick on 14<sup>th</sup> March. Industry partner Lockheed Martin participated in the Caithness Engineering Industry day and the Sutherland Jobs and How to Get Them event, as it begins to set out its plans.
- The UK's first Newton Room will open in North Highland College's Thurso campus on 25<sup>th</sup> March (to be officially opened by Richard Lochhead MSP).
- Transport Scotland has awarded the £9.6M contract to develop the A9 Berriedale Braes enhancement project to RJ Macleod. Around 60 jobs would be created through the construction works, which are expected to be completed in Spring 2020.

	Scope of Work	Progress		
This period		This period	Next period	
	The geographic proximity of Caithness and particular Wick Harbour to the offshore wind projects (and potential projects) in the outer Moray Firth offers significant economic opportunities in and around the harbour itself and for existing local supply chain companies, as well as offering potential for new business to start up in or relocate to the local area. Significant efforts by Wick Harbour have attracted the offshore wind company Beatrice Offshore Wind Ltd (BOWL) to establish themselves at the harbour, which	<ul> <li>Discussions with Moray West consortium.</li> <li>BOWL and tier 1 suppliers recruiting.</li> <li>Offshore construction 75% complete</li> </ul>	<ul> <li>Onshore O&amp;M base operational.</li> <li>Work with SSE/ BOWL/ O4B contractor to support supply chain mapping for O&amp;M.</li> <li>Consider opportunities emerging through Offshore Wind sector Deal.</li> </ul>	

	will create significant long term direct and indirect	
	skilled employment. Similar efforts are being	
	undertaken to attract Moray Offshore Renewables Ltd	
	(MORL) to use the harbour for their base of operations	
	as well, something that is dependent upon a Contract	
	for Difference (CfD) being awarded, and a final	
	investment decision from Moray Offshore.	
	Alongside the existing investment by BOWL and the	
	potential investment by Moray Offshore, a significant	
	opportunity also exists in the value chain; to maximise	
	the benefit to the local supply chain and/or future	
	locally based supply chain to benefit the local economy	
	and therefore jobs. This Project therefore aims to	
	support the supply chain growth opportunities. This will	
	be a phased approach:	
	• Development and deployment of a supply chain	
	value chain strategy by investigating the needs	
	of BOWL (and potentially MORL should the	
	project progress) from their supply chain for	
	local companies and potential inward investors,	
	conducting a gap analysis.	
	<ul> <li>Work with local partners and locally based</li> </ul>	
	companies to benefit from this information	
	<ul> <li>Work with companies not already based in the</li> </ul>	
	area (where skills gaps currently exist) with a	
	· · · · ·	
	view to attracting them to establish a local presence in the area.	
	<ul> <li>Identify wider service opportunities and develop a work along to an approximate local</li> </ul>	
	develop a work plan to engage with local	
	providers.	

<ul> <li><u>Deliverables</u></li> <li>Report on supply chain requirements of the offshore wind companies.</li> <li>Associated gap analysis of local capabilities.</li> <li>Agreed local supply chain engagement strategy and plan.</li> <li>Agreed wider supply chain investment plan and marketing material to support engagement</li> </ul>		
The success of Atlantis Resources Ltd (ARL) in taking steps to develop the world's first commercial tidal power station in the Pentland Firth offers a number of economic opportunities for the local area. ARL are developing the MeyGen site with an aim to provide ~400MW of generation capacity. They have also acquired the rights to develop the neighbouring Ness of Duncansby and Brough Ness sites with the potential for a further 100MW each. This Project seeks to maximise the opportunities presented by these developments, Should other tidal energy commercial opportunities appear in the future, these will be assessed at the time for inclusion in this project scope. The target areas are: • the O&M opportunities over an assumed lifetime of ~25 years. With an assumed generator output of ~1.5MW, when all arrays are in place there will be a requirement to carry out significant annual planned maintenance, let	Contract for Difference not awarded to project.	Simec Atlantis working on next phase of Meygen project.

the area's supply chain offerings				
This Project concerns the establishment of a satellite launch facility (>500kg payload) on the Moine in Sutherland to enable low cost, micro-launchers to insert satellites into low earth orbits (500-700km altitude). All activities will be undertaken in partnership with a range of industry and Government organisations in order to: • Realise the UK and Scottish Government ambitions of entering this market • Bring economic benefit to the area by generating high value direct, indirect and induced local jobs • Bring wider benefits to the Highlands, Scotland and the UK by capturing a portion of the launch vehicle and satellite technology market	•	Community engagement events commenced – in Melness, Tongue, Thurso and Wick. Melness Crofters Estate voted to continue dialogue with HIE over land. Webpages now created for the project at www.spacehubsutherla nd.com Project Manager and admin now recruited.	•	Continue to work with UKSA staff to provide timely/ accurate information. On-going legal discussions with landlords (Melness Crofters' Estate). Continue to deliver community engagement activities.
<ul> <li>The project is accountable for three key outcomes, i.e.:</li> <li>Capture involvement and commitment of commercial launch vehicle operators to use a facility in North Sutherland</li> <li>Based on Industry User Requirements, procure a commercial Launch Site Operator (LSO) and establish a fully functional launch facility with ancillary services. This facility should be expandable to accommodate increasing use by other Launch Vehicle Operators</li> <li>Capturing the interest and commitment of the space industry to bring benefit to the entire value chain, by using the wider supply chain</li> </ul>				

<ul> <li>The project will deliver, coordinate, manage, facilitate as appropriate all supporting activities around these three outcomes, eg.: <ul> <li>Project management, funding, procurement of commercial LSO.</li> <li>Communications and stakeholder management</li> <li>Tourism development</li> </ul> </li> <li>Deliverables: <ul> <li>Strategic Outline Case for a Launch Facility in North Sutherland</li> <li>Strategic Business Case for a Launch Facility in North Sutherland</li> <li>Achieve planning consent from Highland Council/ Scottish Govt</li> <li>Achieve air-space control plan from CAA.</li> <li>Implemented communications and stakeholder engagement plans</li> <li>Procurement of a Launch Site Operator</li> <li>A managed risk and opportunities register</li> </ul> </li> </ul>		
To maximise the utilisation of existing and future skills generated in Caithness to attract companies offering business services into the area. This Major Project is an inward investment activity that will coordinate, manage and facilitate as appropriate all local and market contact to attract companies to establish themselves in the local area and realise the objectives below.	<ul> <li>Working with key nuclear services companies to support forward plans.</li> </ul>	<ul> <li>Working with key nuclear services companies to support forward plans.</li> <li>Monitor progress with Sykes Homeworking</li> </ul>

<ul> <li>This Major Project will consist of several phases:</li> <li>Skills availability (current, future) and development of suitable skills</li> <li>Market analysis, followed by matching of business requirements with available skills</li> <li>Plans – to capture business interests, taking forward a case management approach by running planned campaigns to attract companies to locate into the local area</li> <li>Realisation – the establishment of a business in the region, with appropriate support.</li> </ul> Deliverables: <ul> <li>Labour Market Intelligence reports</li> <li>Market analysis report</li> <li>Organised campaigns</li> </ul>	project.
<ul> <li>To maximise the opportunities presented by the skills and/or current major nuclear companies in the local area to focus on a national and international nuclear services market, particularly: <ul> <li>Decommissioning</li> <li>O&amp;M</li> <li>New Build</li> </ul> </li> <li>This project focuses on the support required by nuclear companies and the assistance and encouragement they might need to establish businesses in the local area that transcend the closures of Dounreay and Vulcan. It will coordinate, manage and facilitate as appropriate all activities necessary to assist the companies establish</li> </ul>	

<ul> <li>themselves in the local area with a business services rather than their previous site management remits and realise the objectives (see Benefits) below.</li> <li>In parallel, this Project will work with Dounreay and Vulcan sites on the outputs from their staff transition plans so these skills can be used to attract either local company growth or inward investment into the area.</li> <li><u>Deliverables:</u></li> <li>Mutually agreed project plans (including land/ property requirements where required) for Nuclear Services companies that will support their ambitions as Caithness-based businesses</li> <li>Labour Market Information based on Skills Transition Plans for both Dounreay and Vulcan workforces, identifying available skillsets.</li> </ul>		
The success of the North Coast 500 offers a number of opportunities to the local area. A multi-agency working group has been established to consider issues & opportunities, and to optimise the economic and community benefits for those parts of the route that can be supported. This project looks at supporting employment generating opportunities in Caithness and North Sutherland created by the increased footfall and profile that the NC500 has brought and is likely to continue to bring over and above those being actively worked on by the already established working group.	<ul> <li>Review of NC500 priorities being undertaken by HIE through the NC500 Working Group. Working Group met on 9<sup>th</sup> January 2019.</li> </ul>	<ul> <li>Review existing scope and plan based on findings from review.</li> </ul>

<ul> <li>Specific issues that this Major Project is focussing on are:</li> <li>Investigation of possible job creating projects that may come forward as a result of the success of NC500</li> <li>If appropriate the encouragement, facilitation and support to the establishment of a new "5 star equivalent" hotel in Caithness either by local companies/individuals or by national/international companies.</li> <li>Other activities will be defined</li> </ul>	
<ul> <li>The development is focussed on several phases:</li> <li>Definition of those investment opportunities that the NC500 may generate.</li> <li>Investigation into other gaps in the local provision of services associated with NC500 that could lead to investments that would lead to the net creation of jobs.</li> <li>The project will then be reviewed once the investigation has been undertaken.</li> </ul>	
<ul> <li><u>Deliverables:</u> <ul> <li>Investment opportunities and gap analysis reports in local provision to realise those opportunities</li> <li>Review of opportunities taking into account existing industry capabilities</li> </ul> </li> </ul>	

•	Project Scope agreed	Continue to work on
•	Scrabster Harbour	funding for Ola pier
	Trust continues to	project.
	work on plans for	
	harbour infrastructure	
	improvements.	
	Funding discussions	
	with partners on Ola	
	Pier project.	

Establish a Strategy and Action Plan, developing a set of activities that will help mitigate risks to successful implementation of the CNSRP programme.	<ul> <li>Draft report available from Caithness Chamber.</li> <li>Newton Room to open at NH College, 25<sup>th</sup> March</li> </ul>	<ul> <li>Finalise plan.</li> <li>Discussions on NH College capital plans.</li> </ul>
To deliver a realigned stretch of the A9 Trunk Road at the north side of Berriedale Braes, addressing the current issue with both the gradient and severity of the hairpin bend.	<ul> <li>RJ Macleod awarded contract.</li> <li>Initial grounds works March 2019.</li> </ul>	<ul> <li>Further updates on outcome of onsite works.</li> </ul>
HIE will pro-actively seek to attract companies, in the energy and business services sectors, to relocate part of their existing business to the area. This will be carried out in a number of ways drawing on others within HIE, Scottish Enterprise and Scottish Development International to assist in this approach. Marketing of the area, raising awareness of the skills and supply chain capability that already exists will form a part of this scope as well as regular business meetings.	<ul> <li>Small number of live opportunities being developed.</li> </ul>	<ul> <li>Continue to leverage wider contacts and to grow the number of general investment cases being managed with a chance of success.</li> </ul>

To gather, collate and disseminate information to partners and stakeholders on the range of jobs being created and retained in the area economy of Caithness and North Sutherland. Also where possible to identify jobs lost to the area economy through any redundancies and business contractions/ closures and share this information with CNSRP partners.	<ul> <li>Total of 270 FTE jobs (260 new, 10 secured).</li> </ul>
