

VULCAN NRTE Report to the DSG – July 2022**Health and Safety/COVID-19**

1 minor first aid case reported in April – employee – recurrent back spasm.

1 minor first aid case reported in June – employee – cut to finger.

1 personnel minor contamination event reported in June – employee – very small area of loose contamination (below -reportable levels to DNSR/ONR)

Whilst we have reduced mitigation measures and noting the legal requirement for self-isolation has been removed, we are emphasising to all at Vulcan that if they display any symptoms of COVID – or indeed any other contagious illness – they should not come to site and self-isolate at home.

The recent surge in cases of COVID-19 locally has led to an increased number of individuals both contracting the virus and managing family isolations. Indications, however, are that this is driven by community transmission, rather than on-site contact. This has not impacted our ability to maintain a safe and secure site or deliver the programme. The site continues to provide LFD home test kits (whilst we have stocks).

Vulcan will become fully smoke free (no vaping) from 1 August 2022 in accordance with MoD Policy.

Environment

There have been no challenges to the Approval of Arrangements (AoA) limits during this period.
