

3 April 2023

Dear Struan, Davie & DSG members

I'm pleased to announce that, following months of hard work across both organisations, Dounreay has successfully joined with Magnox Limited effective as of Saturday 1 April.

This joining is part of the NDA's wider programme of change. First bringing together the organisations involved in delivering its decommissioning mission into one group, and then strengthening and simplifying the operating model around four operating companies: Magnox and Dounreay; Sellafield; Nuclear Transport Solutions and Nuclear Waste Services.

I will continue to lead the site under the new arrangements alongside my executive team. As part of the new arrangements, the Nuclear Site Licence for Dounreay is now held by the Magnox Limited Board and I have been appointed to the board of directors and will report to Gwen Parry-Jones, until she becomes the first interim CEO of Great British Nuclear (GBN) on 1 May and Rob Fletcher takes her place at Magnox.

There will be no fundamental change to the current work programmes at the Magnox sites or Dounreay. Over time there will be opportunities for collaboration and sharing our skills and knowledge. This will include changing the Magnox Limited name in the future to better represent our wider family. Our focus remains on decommissioning our sites safely, securely and cost-effectively.

Your sincerely

Mark Rouse
Managing Director, Dounreay
