Dear David,

On behalf of the DSG, I have been actioned by our members to ask the NDA about the agreement between the United Kingdom and The United States that involved High Enriched Uranium produced at the Dounreay site.

Whilst I appreciate that this is not an active matter either for the NDA or the DSG, it was intimated at the time that these fuel shipments would lead to nuclear isotopes used in medicine being produced.

<https://www.gov.uk/government/case-studies/export-of-high-enriched-uranium-in-support-of-medical-isotope-production>

The DSG would appreciate a high-level update on whether medical isotopes were created from Dounreay material and whether any have been repatriated back to The United Kingdom.

I appreciate that this may take time pull-together (as I understand it sits across a number of Government Departments). As a result, the DSG have not put a deadline against this action... but would appreciate a written response as soon as you are able to provide one.

Yours sincerely
